Junior Software Developer with experience building full-stack web applications and backend systems. Strong foundation in REST APIs, relational databases, authentication, and MVC architecture. Seeking an entry-level software developer role.

## PROJECTS

### MEMBERS ONLY – AUTHENTICATION-BASED MESSAGE BOARD – NODE.JS, EXPRESS, POSTGRESQL, EJS

- Built a full-stack web application with user authentication and authorization.
- Implemented session-based authentication using Passport.js.
- Implemented role-based access control to restrict content visibility based on user authentication status.
- Deployed applications using Vercel and Railway.

### GYM INVENTORY MANAGER - NODE.JS, EXPRESS, POSTGRESQL, EJS

- Developed a CRUD web application to manage gym equipment.
- Implemented relational database design (one-to-many relationships).
- Added search, edit, and delete functionality using server-side rendering.

### PORTFOLIO WEBSITE (REACT, TAILWIND, VERCEL)

- Built and deployed a personal portfolio showcasing projects.
- Implemented reusable components, routing, and dark/light mode support.
- Optimized layout and content for recruiter readability.

## EXPERIENCE
